

ACSM Implementing New Association Management System

It's time to modernize!

An association management system, or "AMS," is the behind-the-scenes software that allows membership organizations like ACSM to function at peak efficiency. AMS systems centralize processes like membership renewal, analytics and revenue tracking, minimizing manual data entry and increasing efficiency.

How will the new AMS benefit ACSM members and certified professionals?

The new system will make it easier to:

Get a copy of your certification

Pay regional and national ACSM dues at the same time

Reset your password and unlock your account

Track your CECs

It will also:

Improve the event-registration process

Streamline your access to educational resources

Give you immediate access to member benefits
