### Competencies:

<u>Certified Group Exercise Instructor® (ACSM-GEI®)</u> ACSM-GEIs are fitness professionals who safely teach, lead and motivate individuals through intentionally designed, effective exercise classes. These instructors provide safe instruction across many class types and equipment sets, from choreographed fitness classes to HIIT and beyond.

**Education Level:** Minimum High School Diploma (or equivalency).

An ACSM-GEI is a certified professional with competency in the following areas:

- Safe, group exercise programming for general population
- Effective use of and delivery of multiple modalities of exercise (e.g., choreography-based, HIIT, bootcamp, etc.)
- Incorporation of movement across all planes of motion and using prime movement patterns
- Effective delivery / teaching / leading group exercise programming
- Teaching to all levels, offering regressions and progressions
- Effective use of music, timing and equipment
- Provide effective on- and off-mic form correction in a group setting
- Provide education, motivation and inspiration for individuals to start and stick with an exercise routine
- Facilitates adherence to exercise through coaching on goal setting and goal adjustment, uses communication techniques like motivational interviewing, etc.
- Client communication:
  - Answers general questions about exercise prescription, including FITT, movements and equipment
  - Provides public health level education on nutrition related to performance, health promotion, and exercise science related topics
  - o Refers out to appropriate professional as needed

ACSM Certified Personal Trainer® (ACSM-CPT®) is qualified to plan and implement exercise programs for healthy individuals or those managing a controlled medical condition. The ACSM-CPT® facilitates motivation and adherence, as well as develops and administers fitness assessments and programs designed to enhance muscular strength, endurance, flexibility, cardiorespiratory fitness, body composition and/or any of the motor skill-related components of physical fitness.

**Education Level:** Minimum High School Diploma (or equivalency).

An ACSM-CPT® is a certified professional with competencies in the following areas:

 Safe, effective program development and delivery for healthy individuals (or those who have received medical clearance to exercise) for either general health or specific outcomes

- Develops and administers programs designed to enhance muscular strength, endurance, flexibility, cardiorespiratory fitness, body composition and/or any of the motor skill-related components of physical fitness
- Conducts preparticipation health screenings, body composition assessments, and basic fitness assessments and field tests to inform the development of safe and effective fitness programming
- Movement assessment (both ongoing and as part of the client intake process) to inform smart and effective programming based upon client goals
- Provide education, motivation and inspiration for individuals to start and stick with an exercise program
- Facilitates adherence to exercise through coaching on goal setting and goal adjustment, uses communication techniques like motivational interviewing, etc.
- Client communication:
- Answers general questions about exercise prescription, including FITT, movements and equipment
- Provides public health level education on nutrition related to performance, health promotion, and exercise science related topics
- Refers out to appropriate, licensed professional as needed (e.g., supplementation questions should be directed to a registered dietitian)

ACSM Certified Exercise Physiologist® (ACSM-EP®) works with apparently healthy clients and those with medically-controlled diseases to establish safe and effective exercise and healthy lifestyle behaviors to optimize both health and quality of life. The ACSM-EP® conducts preparticipation health screenings, submaximal graded exercise tests, strength, flexibility and body composition assessments. The ACSM-EP® subsequently develops and administers programs designed to enhance cardiorespiratory fitness, muscular strength and endurance, balance and range of motion. The ACSM-EP® has a minimum of a bachelor's degree in exercise science and is usually self employed or employed in commercial, community, studio, worksite health promotion, university and hospital-based fitness settings.

**Education Level:** Minimum Bachelor's Degree with at least foundational knowledge in Exercise Science.

An ACSM-EP® is a certified professional with competencies in the following areas:

- Works with apparently healthy clients and those with medically-controlled diseases to establish safe and effective exercise and healthy lifestyle behaviors to optimize both health and quality of life
- Develops and administers programs designed to enhance cardiorespiratory fitness, muscular strength and endurance, balance and range of motion
- Conducts preparticipation health screenings, submaximal graded exercise tests, strength, flexibility and body composition assessments

- Provides education, motivation and inspiration for individuals to start and stick with an exercise program
- Facilitates adherence to exercise through coaching on goal setting and goal adjustment, uses communication techniques like motivational interviewing, tracks progress towards goals, etc.
- Client communication:
  - Answers general questions about exercise prescription, including FITT, movements and equipment
  - Provides public health level education on nutrition related to performance, health promotion, and exercise science related topics
  - Refers out to appropriate, licensed professional as needed (e.g., supplementation questions should be directed to a registered dietitian)

ACSM Certified Clinical Exercise Physiologist® (ACSM-CEP®) is an allied health professional with a minimum of a bachelor's degree in exercise science or equivalent and 1,200 hours of clinical hands-on experience or with a master's degree in clinical exercise physiology and 600 hours of hands-on clinical experience. ACSM-CEPs® use prescribed exercise and basic health behavior interventions, as well as promote physical activity for individuals with chronic diseases or conditions; examples include, but are not limited to, individuals with cardiovascular, pulmonary, metabolic, orthopedic, musculoskeletal, neuromuscular, neoplastic, immunologic and hematologic diseases. The ACSM-CEP® provides primary and secondary prevention strategies designed to improve, maintain or attenuate declines in fitness and health in populations ranging from children to older adults.

**Education Level:** Minimum Bachelor's Degree including relevant Clinical Experience.

An ACSM-CEPs® are certified, health care professionals who have the following competencies:

- ACSM-CEPs® use prescribed exercise and basic health behavior interventions, as well
  as promote physical activity for individuals with chronic diseases or conditions; examples
  include, but are not limited to, individuals with cardiovascular, pulmonary, metabolic,
  orthopedic, musculoskeletal, neuromuscular, neoplastic, immunologic and hematologic
  diseases.
- Develops and administers programs designed to enhance cardiorespiratory fitness, muscular strength and endurance, balance and range of motion
- Conducts preparticipation health screenings, submaximal and maximal graded exercise tests, strength, flexibility and body composition assessments
- The ACSM-CEP® provides primary and secondary prevention strategies designed to improve, maintain or attenuate declines in fitness and health in populations ranging from children to older adults.
- Provides education, motivation and inspiration for individuals to start and stick with an exercise program

- Facilitates adherence to exercise through coaching on goal setting and goal adjustment, uses communication techniques like motivational interviewing, tracks progress towards goals, etc.
- Client communication:
  - Answers general questions about exercise prescription, including FITT, movements and equipment
  - Provides public health level education on nutrition related to performance, health promotion, and exercise science related topics
  - Refers out to appropriate, licensed professional as needed (e.g., supplementation questions should be directed to a registered dietitian)

**Table 3: Acceptable and Unacceptable Content** 

Acceptable Topics (YES)	Unacceptable Topics (NO)	
Professional Responsibility		
<ul> <li>Scope of practice / competencies of the certified professional</li> <li>Referring out to appropriate providers</li> <li>Current laws and regulations</li> <li>Data privacy</li> <li>Emergency action plans</li> <li>First Aid and basic injury response courses</li> </ul>	Education that encourages going outside of scope of practice (e.g., diagnosing, treating, rehabilitation, counseling, prescribing meal plans or supplements, etc.)	
Principles of Exercise Science		
<ul> <li>Anatomy</li> <li>Musculoskeletal system</li> <li>Exercise Physiology</li> <li>Energy systems</li> <li>Response to exercise (musculoskeletal, metabolic, endocrine, cardiovascular etc.)</li> <li>Biomechanics</li> <li>Planes of motion, movement patterns, etc.</li> </ul>	Diagnosing or treating a health condition or injury, counseling	

#### **Nutrition Education**

- Knowledge of macro and micro nutrients
- Basics of energy balance
- Hydration as related to exercise
- Nutrition labels, portion sizes (myplate.gov)
- Pre- and post-workout fueling basics (excluding dietary supplements)
- Current Dietary Guidelines and position stands
- Knowledge of current trendy diets

Medical Nutrition Therapy of any sort, which involves individualized prescription of calories, meal plans, supplements, treating medical conditions via nutrition adjustments, etc., and must only be practiced by a Registered Dietitian Nutritionist. Refer to\_this document\_for ACSM's stance on nutrition scope of practice for the fitness professional.

#### **Health Promotion Education**

- Physical activity as linked to obesity and chronic diseases
- Barriers to physical activity at individual and community levels
- Public health guidelines for blood pressure, body mass index, etc.

Education that encourages going outside of scope of practice (e.g., diagnosing, treating, rehabilitation, counseling, prescribing meal plans or supplements, etc.)

## **Exercise Testing & Assessment**

- Varies by certification and associated scope of practice
- Information on basic FITT exercise prescription, as well as techniques to progress and regress exercises to meet the needs of the client
- Field and Clinical Testing procedures and protocols for a variety of client populations, including new testing methods within the competencies of ACSM-CPT, EP and CEP
- Wearable technology (activity monitors)
- Muscular and aerobic fitness field tests
- Physical activity assessments
- Sport performance testing
- Movement, gait, and joint assessments
- Body composition assessment (skinfolds, anthropometric measurements, BIA, BodPod® technology)

Diagnosing based upon results of testing, administration of DXA or MRI scans (unless you have additional, required training)

Exercise Programming & Training			
<ul> <li>Population considerations differ by certification (uncontrolled cardiometabolic disease only for CEP)</li> <li>Outcomes focused training (bodybuilding, distance running, weight loss, general health and fitness)</li> <li>Flexibility</li> <li>HIIT, circuit training, and other popular training techniques</li> <li>Injury prevention</li> <li>Recovery modalities (heat therapy, cold therapy, percussion, vibration, compression, LED light therapy)</li> </ul>	Physical therapy, athletic training, and massage		
1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1	Exercise Psychology		
<ul> <li>Performance and sport psychology</li> <li>Coaching</li> <li>Effects of exercise on mental health</li> <li>Behavior change principles</li> <li>Goal setting</li> <li>Basic motivational interviewing skills</li> </ul>	Diagnosing or treating mental illness (e.g., Counseling to treat an eating disorder is outside the scope of practice. Coaching to improve performance or encourage healthy lifestyle change is acceptable.)		
Leadership & Business Basics			
<ul> <li>Management and leadership topics</li> <li>Sales</li> <li>Marketing (social media, grassroots, etc.)</li> <li>Finances and basic accounting</li> <li>Interviewing preparation (e.g., resume building)</li> <li>Customer service principles</li> </ul>	Overly promotional materials
